

# INDIA'S TOP 100 STARTUPS ANNOUNCE THEIR ARRIVAL

A new India has taken wings, soaring towards unseen possibilities and a better future. Leading the way are the country's innovators and entrepreneurs, who are using technologies of tomorrow to solve today's challenges. Their heroic endeavours finally found the stage it deserves, with Leap To Unicorn, a startup mentoring and funding program created by IDFC FIRST Bank, in association with Moneycontrol and CNBC-TV18, which has helped shine the spotlight on India's top 100 startups.

It began with 5500+ startups applying to be part of the program. About 600 were selected to undergo a month long bootcamp, during which business leaders and industry

veterans shared lessons in startup funding and operations. Another round of pitches later, an elite jury of investors and VCs selected the top 100 startups, representing different sectors and channeling unique solutions to solve health, financial, technological, logistical and sustainability challenges, while offering new consumer experiences and services as well.

The top 100 startups are true pioneers, who demonstrate the power of hard work and ingenuity. As the first batch of successful startups to emerge from the Leap To Unicorn initiative,

these 100 will continue to occupy a special place in the pantheon of India's startup champions.
